➤ Profile Summary

Results-driven MERN Stack Developer with hands-on experience building and shipping full-stack web applications in live production environments. Proficient in React.js, Node.js, Express, and MongoDB with a strong focus on scalable architecture, responsive UI design, and seamless API integration. Demonstrated ability to deliver end-to-end features from OAuth authentication systems and PDF generation pipelines to SaaS product modules and AI-powered tools across real client and internship projects. Adept at working with Agile workflows, Git-based collaboration, and modern tooling to solve complex engineering problems efficiently.

➤ Technical Skills

Frontend: HTML5, CSS3, JavaScript, React.js, Redux, Bootstrap, Framer Motion

Backend: Node.js, Express.js, RESTful APIs, Python

Database: MongoDB, Mongoose (ODM), SQLite

Libraries & Tools: pdf-lib, html2canvas, Socket.io, Axios, Vite, Framer Motion

APIs & Services: Clerk, Cloudinary, Gemini AI, CloudConvert, Adzuna API

DevOps & Tools: Git, GitHub, Docker, VS Code, Vercel, Render

Core Skills: RESTful API Integration, Authentication (OAuth 2.0, JWT), Responsive Design, Agile Development, Debugging, Performance Optimization, CI/CD

➤ Internship Experience

🏢 Xyzon Innovations

Remote

Full Stack Developer (Intern)

January 2026 – May 2026

- Engineered and shipped **20+ production PRs** across a live MERN stack platform, contributing over **38,000+ lines of code** spanning authentication, payments, AI tools, and SaaS product modules.
- Architected a **Google OAuth 2.0** authentication system with SMTP-based automated email notifications (welcome, OTP, offer letter, certificates) covering **10 independent mail types** with fallback error handling.
- Built a **Certificate Generator SaaS** feature using `html2canvas` and `pdf-lib` with viewport-responsive dynamic scaling via `ResizeObserver`, eliminating manual certificate creation for the team.
- Developed an automated **Offer Letter PDF Generator** using `pdf-lib` with custom font embedding, triggered end-to-end from admin panel approval to applicant inbox.
- Launched a **full courses product line** (6 programs: MERN Stack, Agentic AI, Cybersecurity, Java SE17, Vibe Coding, Japanese) with roadmaps, checkout flows, testimonials, FAQ sections, and payment integration.
- Performed a **platform-wide security hardening pass** — patched critical vulnerabilities in auth and payment controllers, centralized all API base URLs, and deployed an AI-powered chatbot.

🏢 SendNow

Remote

MERN Stack Developer (Intern)

July 2025 – September 2025

- Diagnosed and resolved critical UI and API bugs in the **SendNow analytics dashboard**, re-engineering the frontend layout to achieve **full mobile and tablet responsiveness** across all breakpoints.
- Architected a full-stack **document conversion pipeline** using Node.js, a **Dockerized LibreOffice** instance, and the CloudConvert API to convert DOCX and PPTX files to PDF at scale.
- Built a browser-based **PPTX viewer** in React enabling in-app document rendering, and implemented a **thumbnail preview system** enriched with Open Graph meta tags for social media sharing.
- Delivered features in a live production environment using **Git, code reviews, and Agile sprint workflows**, maintaining zero-downtime deployments across all contributed modules.

› Projects

Nexus — B2B SaaS Project Management Platform nexus-governance.vercel.app

- Built a full-stack MERN project management platform competing with Jira and ClickUp, featuring task governance, team workspaces, role-based access control, and real-time project tracking.
- Engineered a responsive landing page with fluid `clamp()`-based typography, dynamic pricing, comparison tables, and animated testimonial sections deployed on Render and Vercel.
- **Tech Stack:** React.js, Node.js, Express, MongoDB, Redux, Pure CSS

LabLink — Anonymous Collaboration Platform lablink.live

- Engineered a live, full-stack anonymous collaboration platform enabling instant private sharing of ideas and files across ephemeral rooms — deployed and actively accessible at lablink.live.
- Implemented auto-deletion logic where all room data and shared content are purged after a configurable time window, ensuring zero data persistence and complete user anonymity.
- **Tech Stack:** React.js, Node.js, Express, MongoDB, Socket.io, CSS3

ElitePath — Full-Stack Job Portal mern-job-portal-plum.vercel.app

- Developed a full-stack recruitment platform with role-based auth, live job listings via Adzuna API, and AI-powered resume analysis using Gemini.
- Integrated Cloudinary for resume storage, Socket.io for real-time notifications, and Clerk for secure authentication flows.
- **Tech Stack:** React.js, Node.js, Express, MongoDB, Clerk, Cloudinary, Socket.io, Gemini AI

› Achievements

- **Campus Placement — Space Zee Technologies (2026):** Secured a Software Developer role through campus recruitment with a performance-based package of **6–7 LPA**, selected from Mohammed Sathak Engineering College.
- **Intern of the Month × 3 — Xyzon Innovations:** Awarded for three consecutive months in recognition of outstanding full-stack contributions, shipping critical production features, and maintaining high code quality throughout the internship.
